Dear Terry:

Following is the list of the partners in Alee Cellular Communications.

Note corrected addresses, phone numbers have yet to be verified.

Also, note the population of New Mexico 3, 68,000. This is the population the broker (Falkanberg) is willing to use as his basis of projections. (Malarki/Taylor used a higher number.)

I am enclosing directions to the Ramada Inn...for your use.

Please, Terry, don't underestimate the complexities of projections made up by ANY company or engineer/consultant!

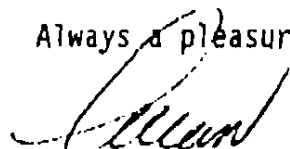

We have already heard that the best of them are accurate to the 31st day!

I have talked to Bob Bernstein...he will be calling you. He was surprised about the Sunday meeting, but he says that he too will sacrifice his day to accomplish what has to be done.

Once again, think seriously about having Jamal working FOR our committee, just as Cordy Overgaard, did in his capacity.

Hopefully, I will be able to reach him tomorrow, to call you. Ask him your most embarrassing questions.

Always a pleasure,

Allan C. Kane
